

Ringing in the new year has never sounded so good! Students in Mrs. Perry's math class set the bar high for 2021 by setting their SMARTgoal for this year and by setting a positive vibe for the upcoming year. Students wanted to graduate high school, complete nursing courses, work on attendance, and much more! What does 2021 have in store for you?

**SET SMART GOALS**

Write two (2) SMART goals for yourself. One should be considered a long-term goal and the other a short-term goal. Remember, your SMART goal should be specific, measurable, achievable, realistic, and timely. Here's an example: **By March 3<sup>rd</sup>, I will raise my grade in math from a 72% to an 84% or higher by turning in all of my homework, attending tutoring, and studying for tests.**

**Short-term goal** (attainable within 6 months):

By June 30th I will lose 25 pounds by eating healthier and exercising 3 times a week.

**Long-term goal** (6 months to a year):

By December 31st 2021, I will have lost 50 pounds by exercising and eating healthier.

**SMART GOAL**

**S** SPECIFIC  
**M** MEASURABLE  
**A** ACHIEVABLE  
**R** REALISTIC  
**T** TIMELY
